- Class 2.2 Non Flammable Compressed Gas
- Class 3 Flammable Liquid
- Class 3.1 Flammable Liquid
- Class 3.2 Flammable Liquid
- Class 3.3(C1) Combustible Liquids
- Class 3.4(C2) Combustible Liquids
- Class 8 Corrosives
- Class 9 Misc DG's

Customers can help ensure safety and efficiency

All Riteway Express drivers have been trained in the handling of dangerous goods.

Laws and regulations insist that the customer must adhere to the following procedures of consignment detail:

- Consigner's name and contact number are clearly stated
- Proper shipping name of the goods, or the name that appears on the packaging or bulk container
- The class of goods including the subsidiary risk if applicable
- The UN number of the goods
- The packaging group number if any
- A description of the package, e.g. Drum, Carton
- The number of packages or bulk units
- The net quantity of the goods by the type.

We will at all times endeavour to inform the customer of future changes to the Dangerous Goods classifications, but it will always remain the customer's responsibility to maintain an educated understanding of their freight and its compliancy with the classifications.

With customer support and cooperation, these restrictions ensure that Riteway Express and all its customers comply with the law and provide a safe working environment.
